Objective

Computer Engineering graduate trained in Java full-stack development, with hands-on project experience using Java, Spring Boot, Hibernate/JPA, MySQL, React, and REST APIs. Built a hotel booking application with Spring Boot and React, and an ML-based car price prediction solution. Seeking an entry-level Java Developer or Software Engineer role.

Education

B.Tech, Computer Engineering — Vilasrao Deshmukh Foundation Group of Institutions, Latur — CGPA : 7.87
Bachelor of Technology (Computer Engineering) — *2021 – 2025*

Janata Vidya Mandir , Murud — Percentage : 87.17
12th (HSC) — *2020 –2021*

Dadoji Kondadev Madhyamik Vidyalay , Jaiphal — Percentage : 81.20
10th (SSC) — *2018–2019*

Experience

Java Full Stack Developer Trainee — QSpiders — Mar 2025 – Feb 2026
Pune, India

- Completed intensive Java full-stack training covering **covering Core Java, JDBC, Servlets, JSP, SQL, Spring Boot, Hibernate/JPA, and React.**
- Built REST APIs with Spring Boot integrated with MySQL via Hibernate/JPA, and React front-ends that consume them, through practical, scenario-based assignments.
- Applied MVC architecture, OOP principles, and Git/GitHub version control throughout.
- Learned backend development concepts, including dependency injection, request handling, and REST API integration.
- Developed practical understanding of frontend and backend integration in full-stack applications.
- Strengthened knowledge of software development fundamentals and coding practices through hands-on training.

Software Development Intern — Nov 2024 – Feb 2025
TechnoHacks EduTech

- Built a comprehensive Laptop Ecommerce Platform enabling users to explore, search, and purchase laptops with a seamless and responsive user experience. **Technologies: HTML,CSS,JavaScript,Jsp,Sevlet**
- Integrated advanced functionalities including secure login/signup with OTP verification, cart management, order tracking, profile management, contact support, and an admin panel for managing users, laptops, and orders.
- Strengthened practical skills in HTML, CSS, JavaScript,Jsp,Servlet through hands-on tasks.
- Strengthened practical skills in web development, application functionality, and problem-solving through hands-on assignments.
- Developed an admin panel to manage laptop listings, user details, and customer orders.
- Applied client-side form validation and JavaScript event handling to improve form usability and data accuracy.

Projects

Food Ordering and Delivery Application | React.js, Spring Boot, MySQL — view project

- Developed a full-stack food ordering application with a responsive React.js frontend and Spring Boot REST APIs.
- Implemented user authentication, JWT-based authorization, and role-based access for users and administrators.
- Built features for food management, cart operations, order placement, payment processing, order tracking, and customer reviews.
- Integrated MySQL for data persistence and implemented backend business logic for secure and efficient order management.
- **Technologies:** React.js, Java, Spring Boot, REST APIs, Hibernate JPA , MySQL, JWT, HTML, CSS, JavaScript.

StudyNotion – Ed-Tech Learning Platform | MERN Stack(Express.js , React.js ,MongoDB) view project

- Developed a full-stack ed-tech platform using React.js, Redux, Node.js, Express.js, and MongoDB to facilitate online learning.
- Implemented user authentication, role-based access, course management, instructor profiles, and student enrollment.
- Built features for course content delivery, video-based learning, course progress tracking, ratings, reviews, and payment processing.
- Designed RESTful APIs and integrated MongoDB for efficient data management across users, courses, sections, and subsections.
- **Technologies:** React.js, Redux, Node.js, Express.js, MongoDB, REST APIs, JavaScript, HTML, CSS , Tailwind CSS

Cake Shop Website view project

- Developed a responsive Cake Shop website using React.js, HTML, CSS, JavaScript, and REST APIs.
- Integrated REST APIs to dynamically fetch and display cake product details, including product images, names, prices, and descriptions, reducing the need to maintain product information directly within the UI components.
- Implemented interactive product cards with organized layouts, attractive styling, and hover effects to enhance product presentation and provide a better browsing experience for users.
- Designed and developed reusable React components for the header, navigation bar, homepage, product listings, and other sections to maintain a modular code structure and improve application maintainability.
- **Technologies:** React, HTML, CSS,JavaScript, APIs.

Technical Skills

Programming Languages	:	Java
Web Technologies	:	HTML , CSS , JavaScript
CSS frameworks	:	Bootstrap , Tailwind CSS
Frontend Technologies	:	React.js , Redux Toolkit
Backend Technologies	:	Servlets , JSP , Hibernate , JSTL , Spring Framework , Spring Boot, Express.js
Databases	:	MySQL , MongoDB, Basic Of PL/SQL
Dev Tools	:	VS Code , GitHub,Eclipse,STS,Postman

Certifications

* Software Development — QSpiders | 2026
* Full Stack Java Development Certificate

LANGUAGES

* **Marathi** , **Hindi** , **English**
