Objective

A motivated Computer Science graduate seeking a software engineering position to apply my programming skills, full-stack development knowledge, and machine learning fundamentals while contributing to real-world projects and continuously enhancing my technical expertise.

Education

Pimpri Chinchwad College of Engineering and Research, Pune — CGPA : 8.35
Bachelor of Engineering -Computer Engineering — *2021 – 2025*

Janata Vidya Mandir , Murud — Percentage : 93.83
12th (HSC) — *2020 – 2021*

Dadoji Kondadev Madhyamik Vidyalay , Jaiphal — Percentage : 82.60
10th (SSC) — *2018–2019*

Experience

Full Stack Java Development Trainee — August 2025 – May 2026
Envision Computer Training Institute Pvt. Ltd

- Gained hands-on experience in frontend and backend development using HTML, CSS, JavaScript, Java Servlets, JSP, Hibernate JPA , MySQL , Spring , Spring Boot
- Implemented authentication, authorization, JWT-based security, and role-based access control.
- Developed a Food Ordering and Delivery Application with REST APIs, MySQL integration, and responsive UI design

Software Intern — Dec 2025 – Feb 2026
EduNexa Tech Pvt. Ltd

- Built a laptop e-commerce website with product catalogs, product details, and an interactive user interface.
- Developed server-side functionality using Java Servlets and JSP to process client requests and generate dynamic web pages.
- Used JDBC and MySQL to store, retrieve, and manage product and user data efficiently.
- Implemented CRUD operations to manage product information and maintain consistency between the application and database.

Software Intern — July 2024 – Oct 2024
Celebal Technologies

- Developed a SQL-based system to analyze departmental salary data using complex SQL queries, joins, aggregate functions, and subqueries. Technologies: SQL
- Applied relational database concepts to retrieve, filter, and organize employee salary records.
- Analyzed salary data to identify department-wise trends and generate meaningful insights.
- Improved query efficiency by writing structured SQL queries for accurate data retrieval and analysis.

Projects

Food Ordering and Delivery Application | React.js, Spring Boot, MySQL | Source Code — View Project

- Developed a full-stack food ordering application with a responsive React.js frontend and Spring Boot REST APIs.
- Implemented user authentication, JWT-based authorization, and role-based access for users and administrators.
- Built features for food management, cart operations, order placement, payment processing, order tracking, and customer reviews.
- Integrated MySQL for data persistence and implemented backend business logic for secure and efficient order management.
- **Technologies:** React.js, Java, Spring Boot, REST APIs, Hibernate JPA, MySQL, JWT, HTML, CSS, JavaScript.

StudyNotion – Ed-Tech Learning Platform | MERN Stack - Express.js , React.js ,MongoDB | Source Code view project

- Developed a full-stack ed-tech platform using React.js, Redux, Node.js, Express.js, and MongoDB to facilitate online learning.
- Implemented user authentication, role-based access, course management, instructor profiles, and student enrollment.
- Built features for course content delivery, video-based learning, course progress tracking, ratings, reviews, and payment processing.
- Designed RESTful APIs and integrated MongoDB for efficient data management across users, courses, sections, and subsections.
- **Technologies:** React.js, Redux, Node.js, Express.js, MongoDB, REST APIs, JavaScript, HTML, CSS , Tailwind CSS

Emotion Detection from Text | Deep Learning, NLP, BiGRU, FastAPI | Source Code view project

- Developed a text-based emotion classification model using a Bidirectional GRU (BiGRU) network to identify six emotions: joy, sadness, love, anger, fear, and surprise.
- Implemented text preprocessing, tokenization, sequence padding, and model evaluation using TensorFlow and Keras.
- Deployed the trained model using FastAPI REST APIs to return predicted emotions, confidence scores, and emotion-wise probabilities.
- **Technologies:** Python, TensorFlow, Keras, BiGRU, NLP, Pandas, NumPy, FastAPI, Scikit-learn.

Student Social Media and Mental Health Prediction | Machine Learning, FastAPI | Source Code view project

- Developed a machine learning model to predict students' mental health scores using social media usage, sleep, stress, and lifestyle factors.
- Implemented data preprocessing, exploratory data analysis, and Random Forest hyperparameter tuning using RandomizedSearchCV.
- Deployed the trained model using FastAPI to provide real-time predictions through REST APIs.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, FastAPI,Pydantic , Seaborn, Matplotlib, Joblib.

Technical Skills

Programming Languages	:	Java , CPP , Python
Web Technologies	:	HTML , CSS , JavaScript , JQuery , Bootstrap , Tailwind CSS
Frontend Technologies	:	React.js , Redux Toolkit , Angular
Backend Technologies	:	Servlets , JSP , Hibernate , JSTL , Spring Framework , Spring Boot , Express.js , PHP
Databases	:	MySQL , MongoDB , Basic Of PL/SQL
Machine Learning and AI	:	Supervised, Unsupervised, Reinforcement, Deep Learning, Natural Language Processing(NLP).
Python Libraries	:	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
Dev Tools	:	VS Code, GitHub, Eclipse , STS , MongoDB Compass, MongoDB Shell , MySQL Workbench , Jupyter Notebook , Postman , XAMPP

Certifications

- MERN Stack Web Development Certificate - CodeHelp
- Full Stack Java Development Certificate
- Machine Learning Course Completion Certificate – Udemy
- Data Structures and Algorithms (DSA) Certification- NPTEL

ACHIEVEMENTS

- Research Paper Published on IEEE Xplore: "Resale Car Rate Prediction Using Machine Learning" (2025).
- Solved more than 600+ problems on Leetcode and GFG , HakerRank and CodeChef
- 5-star Rated Coder at HackerRank.

LANGUAGES

- **Marathi** , **Hindi** , **English**
